Senior Data Engineer with 5+ years building large-scale Spark ETL, reliable data platforms, and analytics-ready pipelines (Spark, Scala, SQL, Python, Airflow, AWS). Currently at JioHotstar on AdTech data systems — distributed processing, batch and streaming workloads, data quality, and performance. Proven delivery across high-volume ETL, cloud data platforms, and production reliability.

Professional Experience

Senior Data Engineer (Full-Time) | JioHotstar | Remote Sep 2026 – Present

- Build and maintain large-scale ETL pipelines powering AdTech advertising insights and analytics.
- Develop and optimize distributed Spark applications (Scala / PySpark) and SQL workloads for batch and streaming use cases.
- Own data quality, pipeline performance, and cost efficiency; support cloud/containerized deployments with eng and analytics partners.

Contract Data Engineer | Handshake AI · Tensium | Remote Jul 2026 – Sep 2026

- Built Python data pipelines for large-scale dataset processing, automated validation, and reporting (Docker, Git, Linux).
- Delivered reproducible pipeline workflows and quality checks for high-volume analytical / benchmark workloads.

AI Data Engineer (Contract) | Mercor | Remote Aug 2025 – Jul 2026

- Architected scalable Python, SQL, and AWS data pipelines transforming and standardizing 100K–500K+ records into analytics-ready datasets.
- Delivered production data platforms with strong QA practices, achieving 99.5%+ data accuracy for downstream analytics and ML workloads.

Data Engineer (Full-Time) | Team Computers | Remote Aug 2024 – Jul 2025

- Built and maintained scalable ETL/ELT pipelines using Python, SQL, Apache Spark (PySpark), and Apache Airflow; improved performance and cut manual processing by 50%.
- Designed and optimized PostgreSQL/MySQL data models; maintained production pipelines with 99.9% reliability.

Project Engineer (Full-Time) | Wipro | Remote (Pune) Sep 2021 – Aug 2024

- Optimized enterprise data pipelines and workflows using Python, SQL, and AWS; resolved 100+ data-related issues daily; CSAT 4.8/5.0.
- Modernized Python- and SQL-based transformation, reporting, and automation (AWS, Tableau, Excel); reduced manual effort by 25%.

Key Skills

Data Engineering & Pipelines: Apache Spark (Scala, PySpark, Spark SQL), ETL/ELT, Apache Airflow, Kafka, AWS Glue, dbt, Delta Lake

Programming Languages: Python, Scala, SQL

Databases & Storage: PostgreSQL, MySQL, MongoDB, Snowflake, Redis, Parquet, Avro, S3, GCS

Cloud & Platforms: AWS (S3, Glue, Lambda, Redshift, EC2, IAM), Google Cloud Storage, Kubernetes

Data Quality & Processing: Great Expectations, Pandas, NumPy, data validation, performance tuning

APIs & Backend: FastAPI, REST APIs

DevOps & Tooling: Docker, Git, GitHub, GitHub Actions, Linux, Jenkins
